introduction according to the ancient greeks it was a demi god dionysius who taught them the pleasures of making wine and
drinking it no wonder he was always shown with grapevine leaves around his head the romans called him bacchus and also
eleutherios which meant the liberator the idea was those taking part in celebrating his existence were free from care and worry
that was because they drank freely of the fruit of the grape during their bacchanals a greek friend told me that according to
greek legend dionysius was supposed to have come to india and alexander the great during his conquest entered an eastern
city called nysa of which the inhabitants told him of its raising by this demi god he taught them practices which were
incorporated in their own social rituals and festivals ah well that is a good myth but then wine was definitely not unknown in
the east it was one of the first gourmet pleasures discovered and appreciated for millenniums so if this demigod came to the

indian subcontinent he would have been fed madira or soma rasa the ancient and traditional drink of the gods the names dennis denise and dion are derivatives from this original greek name so for all of us who would like to raise a toast to the gods in a glass of homemade wine this book is going to teach you how you can grow vines very successfully in sunny atmospheres after that it is going to teach you how to make wines for home consumption if you look at wine making practices which are being practiced today it is a very scary and complicated process this is because of our usage of complex and complicated tools the practices i am going to teach you have been in use for centuries you are not going to be buying expensive tools you are going to be making wine the traditional way

medicinal value and virtue this is how prehistoric man found out that moss sphagnum was an excellent healer of wounds just imagine he went hunting and got into an argument with a sabertooth and there he was with wounds all over his body lying nose down on the mossy ground so he found himself clutching a handful of moss squeezing it and trying to stop the blood flow from the wounds hey the moss was so absorbent that it stopped the wound from bleeding any more so back he came back to his tribal camp with moss sticking all over his body after a week or so he noticed that his wounds were healing really well now most of this was just by trial and error and luck his genetic makeup was strong and his diet conducive to good natural healing but that meant that the next time he went on the warpath with other tribes in the vicinity he made sure that the healer had packed lots of sphagnum along with food in a pouch for every warrior early civilizations inherited this knowledge and developed it even further and both doctors and cooks used herbs appreciatively and with increasing beneficial effects doctors experimented with every kind of plant and cooks with the more deliciously flavored types
